

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

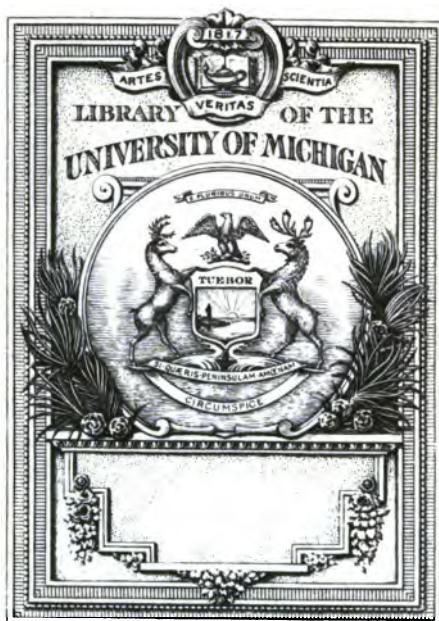

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

UTILITY, being the principal object with the Authors in submitting the following Work to the public eye, they wish to avoid entering at large into the merits of its execution; and leave it entirely to the candour of a liberal Public to decide, how far they have succeeded in their design. The use of the following Tables, it will appear evident, is not circumscribed to Gentlemen of one Profession only; Men of Business in general will find them an advantageous addition to the furniture of their Writing-offices; they will not fail in many respects to facilitate the work of the Landsurveyor; and are specially adapted to all concerned in Agricultural affairs. It is now become a general practice to sell growing corns, &c. by public roup, in small lots, at so much per acre, and the purchasers to grant bills immediately to the amount of their purchases: the calculations are therefore required to be made in the bustle of a roup, or shortly after; in either case, great dispatch is indispensibly requisite, and consequently errors are almost unavoidable; to obviate these, and to prevent drudging through the multiplicity of intricate calculations which frequently occur in the course of business, the first Table of this publication is chiefly designed: It shows at one view, without calculation, the amount of any number of Acres, Roods, and Falls, from 1 fall to 30 Acres, at any given rate from 1 Shilling to £.300 per Acre, so that purchasers by this Table alone can know the exact amount of their purchases. It will also be found very useful to the

8-10-39 mch

Farmer, for ascertaining the amount of all kinds of Labour contracted for by the Acre, such as mowing, reaping, paring, trenching, &c. &c. and the sellers and buyers of land will find it well adapted for ascertaining the amount of their sales and purchases.

Tables turning Acres, Roods, and Falls, into money have already made their appearance in the world, but any which the Authors of this publication have examined, appear to them so limited and imperfect, as to be of little or no use to the Man of business in making his calculations.

In order to make this Work of more general utility, a number of other Tables are added, of each of which an explanation and examples are given in their proper places.

The value and accuracy of many of these Tables having been proved by an extensive practice of nearly 50 years, they cannot fail to be highly useful to Proprietors, Farmers, and others having concern with landed Property: And accuracy being the best recommendation of a work of this nature, the Authors have bestowed more than ordinary pains in the calculations, and they flatter themselves they will be found correct.

CUPAR-FIFE,
24th October, 1814. }

CONTENTS.

NUMBERS— <i>by which, if Links of the Scotch and English Chains be Multiplied, will produce Ells, Yards, and Feet, - - - - -</i>	187
TABLE X.— <i>Shewing the Length and Breadth in Ells required for 1 and 2 Lippies of 100 square ells each, from 2 to 26 ells in breadth, - - -</i>	188
TABLE XI.— <i>For Measuring Dykes or Walls, from 1 foot 6 inches to 15 feet high, the length being taken in Scotch Chains, and multiplied by the numbers opposite their different heights, will give mason roods of 36 square yards, - -</i>	191

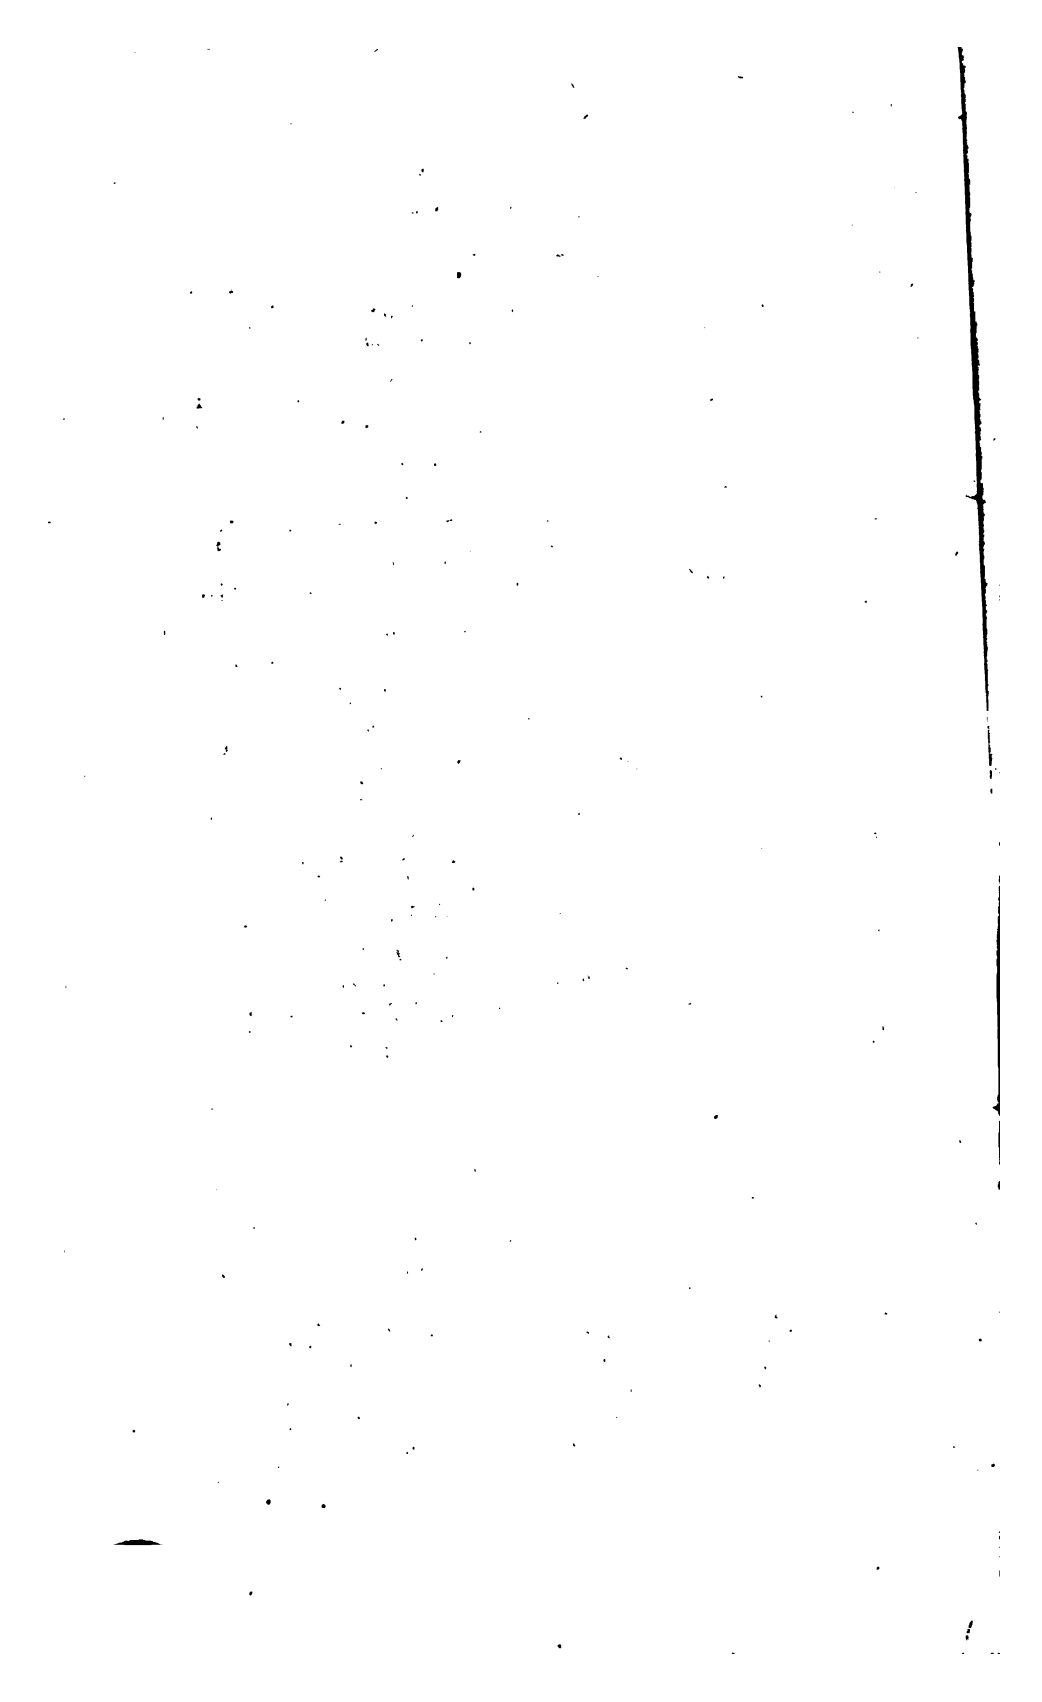

TABLE I.

For FINDING the VALUE of LAND, or for turning

Acres, Roods, and Falls into MONEY, from

1 Fall to 30 Acres, and from 1 Shilling

to £. 300 per Acre.

EXPLANATION.—In the left-hand column is the quantity of land in Acres, Roods, and Falls; and opposite, in the other columns, is the Value in Money, at different rates per acre, as specified on the top of the columns.

Example 1st.—Suppose you purchase a lot of growing corn, containing 37 falls, valued at £. 12 14s. per acre, and you wish to know its amount: Look into the Table, at the top of the columns for the rate £. 12 14s. and in the same column opposite to 37 falls you have £. 2 18s. 8½d. the amount required.

Example 2d.—Suppose a farmer agrees with a contractor to reap his harvest, which consists of 120 acres, 3 roods, and 32 falls, at 14s. per acre, how much does it cost him? Look in the table for 30 acres, and opposite in the column of 14s. you have £. 21, four times that sum is - - £. 84 0 0

3 roods,	-	-	-	-	-	-	-	0	10	6
32 falls,	-	-	-	-	-	-	-	0	2	9½

The Amount, £. 84 13 3½

Example 3d.—Suppose a farmer agrees with a contractor to trench a park, containing 12 acres, 1 rood, and 18 falls, at the rate of £. 10 15s. per acre, how much must he pay the contractor for his labour? Look in the table for 10 acres, and opposite in the column of £. 10 15s. you have £. 107 10 0

2 acres,	-	-	-	-	-	-	-	21	10	0
1 rood,	-	-	-	-	-	-	-	2	13	9
18 falls,	-	-	-	-	-	-	-	1	4	2½

Amount, £. 132 17 11½

Example 4th.—A proprietor bargains with his farmer to take the last crop of his lease at a valuation, consisting of 40 acres, 2 roods, and 27 falls of wheat, at the rate of £.25 16s. per acre; 35 acres and 3 roods of oats, valued at £.15 12s. per acre; and 45 acres and 16 falls of barley, at the rate of £.16 5s. per acre, how much does the whole crop amount to? Look for 10 acres in the table, and opposite in the column of £.25 16s. you will find £.258, four times that sum is

2 roods,	-	-	-	-	-	12	18	0
27 falls,	-	-	-	-	-	4	7	1

Amount of wheat, £.1049 5 1

In the left-hand column look for 30 acres, and opposite in the column of £.15 12s. you have

5 acres,	-	-	-	-	-	78	0	0
3 roods,	-	-	-	-	-	11	14	0

Amount of Oats, £.557 14 0

Again, look at the top for £.16 5s. and in that column, opposite to 15 acres, you will find £.243 15s. three times that sum is

16 falls,	-	-	-	-	-	1	12	6
-----------	---	---	---	---	---	---	----	---

Amount of barley, £.732 17 6

•A. R. F.

Wheat,—40 2 27 at £.25 16s. per acre, £.1049 5 1

Oats,—35 3 0 at - 15 12s. per acre, - - 557 14 0

Barley,—45 0 16 at - 16 5s. per acre, - - 732 17 6

Amount of the crops, £.2339 16 7

Example 5th.—If you purchase 92 acres and 3 roods of land, valued at £.97 per acre, and wish to know the amount: Look in the left-hand column of the table for 30 acres, and opposite in the column of £.97 you will find £.2910, three times that sum is

2 acres,	-	-	-	-	-	194	0	0
3 roods,	-	-	-	-	-	72	15	0

Amount, £.8996 15 0

From 1 Shilling to 4 Shillings per Acre.

TABLE II.

*Shewing the number of SQUARE LINKS of the Scotch Chain in LIPPIES of 100 square Scotch Ells, from
1 Lippie to 57 Lippies and 60 Ells, being an Acre.*

EXPLANATION.—In the left column are Lippies of 100 square Scotch ells, opposite to which are the Square Links of the Scotch Chain which these Lippies contain.

Example 1st.—Required the Square Links in 36 Lippies? Look into the Table for 36 Lippies, on the right of which stand 62500, the number of Square Links of the Scotch Chain which they contain.

Example 2d.—What Square Links are contained in 54 Lippies, and how many Roods and Falls?—Look in the column of Lippies for 54, opposite to which are 93750 Square Links, which if multiplied by 4 and by 40, and cutting off five places on the right-hand, will produce 3 Roods and 30 Falls.

TABLE III.

[*Shewing the LINKS of the SCOTCH CHAIN in FEET,*
from 1 Foot to 200 Feet lineal.

EXPLANATION.—In the left-hand column are Feet, opposite to which in the other column stand the equivalent Links of the Scotch Chain, with their Decimal Parts.

Example.—Suppose you wish to lay off a Road or Street 30 feet wide with the Scotch Chain;—look in the Table for 30 feet, opposite to which in the column of links you have 40 links and 4 tenths of a link, the width required.

TABLE IV.

*Shewing the SQUARE LINKS in ROODS and FALLS,
from 1 Fall to an Acre.*

=====

EXPLANATION.—The left-hand column shews the quantity in Roods and Falls, and in the right-hand column are the corresponding Square Links.

Example.—If you have a Field 1250 links in length, and sell 2 roods and 20 falls off one side of it; what width must you measure to lay off the exact quantity, and what is the amount at the rate of £. 72 per acre? Look in the right-hand column, opposite to 2 roods and 20 falls, and you will find 62500 square links, which divided by 1250 links the length of the field, give 50 links, the breadth requisite for 2 roods and 20 falls; then by Table 1st,

2 roods at £. 72 per acre, amount to	--	£. 36	0	0
20 falls,	- - - - -	9	0	0

Value required,	£. 45	0	0
-----------------	-------	---	---

NOTE.—This Table will also be found very useful in computing the Roods and Falls; by inspection only, you will find the roods and falls equivalent to any decimal part of an acre, which renders unnecessary the trouble of multiplying by 4 and by 40.

Example.—If the Area of a piece of land is found to be 51250 square links, what is the quantity in roods and falls? Look in the Table for 51250 square links, opposite to which in the other column stand 2 roods and 2 falls, being the quantity equal to the given square links.

TABLE VI.

For turning LIPPIES, of 100 Square Ells each, into
ROODS, FALLS, and ELLS; from 1 Lippie to
57 Lippies and 60 Ells, being an Acre.

EXPLANATION.—In the right-hand column are Roods,
Falls, and Ells, containing the same quantity with the op-
posite Lippies in the left-hand column.

Example.—Suppose you have a piece of land, measuring
36 lippies, which you sell at the rate of £.84 per Scotch
acre, what is its value? Opposite to 36 lippies, in the
Table, will be found 2 roods and 20 falls; then by Table 1st,

2 Roods at £.84 per acre give, - - £.42 0 0
20 Falls, - - - - - 10 10 0

Value required, £.52 10 0

ONE ACRE 57 Lippies and 60 Ells.

TABLE V.

*For turning ROODS and FALLS into LIPPIES, of
100 Square Ells each, from 1 Fall to an Acre.*

EXPLANATION.—The left-hand column contains Roods and Falls, and the other column the same quantity in Lippies and Ells.

Example.—Suppose you have a small Field containing 3 Roods and 30 Falls, which you Let for Lint or Potatoes at the rate of 3s. 6d. per lippie, and you wish to know the rent of the field ;—look in the Table for 3 roods and 30 falls, and opposite in the right-hand column you will find 54 lippies ; at 3s. 6d. per lippie, amount to £.9 9s. the rent of the field.

ONE ACRE. 100000 Square Links.

TABLE VII.

*Shewing the BREADTH in LINKS for 1 ROOD, 2 ROODS,
3 ROODS, and an ACRE, to any LENGTH
from 300 to 1300 Links.*

EXPLANATION.—In the left-hand column is the Length of the ground to be laid off; opposite to which are the Breadths for 1 Rood, 2 Roods, 3 Roods, and an Acre, in their respective columns.

Example.—If you want the different breadths necessary for 1 rood, 2 roods, 3 roods, and an acre, in separate lots, the length of your field being 750 links: Look in the left-hand column for 750 links, and opposite,

In the column of $\frac{1}{4}$ acre, you have 33 $\frac{1}{2}$ links, breadth for 1 rood;

In the column of $\frac{1}{2}$ acre, you have 66 $\frac{3}{4}$ links, breadth for 2 roods;

In the column of $\frac{3}{4}$ acre, you have 100 links, breadth for 3 roods;

In the column of 1 acre, you have 133 $\frac{1}{3}$ links, breadth for 1 acre.

NOTE.—The use of this Table is not limited to the lengths and quantities specified in the table, but may be extended to any length and quantity, by halving, doubling, &c. &c.

Example 1st.—If, from a field 2000 links in length, you wish to know the breadth necessary for laying off an acre: Look in the table for 1000 links, half the length of the field, and opposite in the column of an acre stand 100 links, the half of which is 50 links, the width required for an acre.—If you wish to know the width for 2, 3, 4, 5, or more acres,

you have only to multiply the breadth of an acre, corresponding to your length, by the number of acres you are to lay off.

Example 2d.—Suppose you have a length of 800 links, and wish to know what width is requisite for an acre and 2 roods : Look in the left-hand column for 800, opposite to which,

In the column of an acre, are 125 links,

In the column of $\frac{1}{2}$ acre, are - - $62\frac{1}{2}$ links,

Breadth for 1 acre & 2 roods, $187\frac{1}{2}$ links.

* * * When odd falls are required to be staked off for gardens, &c. find the breadth for 1 rood, corresponding to the length, which breadth multiplied by the number of falls to be laid off, and divided by 40, gives the width required.

Example.—Suppose you have a length of 100 links, and wish to stake off a garden by a parallel line, to contain exactly 20 falls, what is the necessary breadth? Look for 300 in the left-hand column, the corresponding breadth for 1 rood will be found $83\frac{1}{3}$, which multiplied by 3, gives 250, the width for 1 rood, the length being 100; then 250 multiplied by 20 and divided by 40 will give 125 links for the breadth of the garden.

TABLE VIII.

*Shewing the SOLID YARDS, FEET, &c. in DITCHES or CANALS;
from 2 Feet to 20 Feet wide; agreeably to their
different depths.*

EXPLANATION.—The three left-hand columns contain the dimensions of the Ditches or Canals in Feet and Inches; and the other three columns the quantity of solid cutting in a lineal foot, a lineal yard, and in 6 lineal yards, in their respective columns; and the quantities are stated in cubic yards, cubic feet, and the nearest convenient fraction of a cubic foot.

Example 1st.—There is a Canal, 17 feet at top, 7 feet at bottom, and 5 feet deep, to be cut at 4d. per solid yard, required the rate per rood? Look in the left-hand columns for the dimensions of the Canal, and opposite, in the column of 6 yards in length, you have 40 solid yards, at 4d. per yard, amounting to 13s. 4d. the rate per rood.

Example 2d.—Suppose you are employed to cut a Ditch, 6 feet wide at the top, 1 foot at the bottom, and 3 feet deep, at so much per rood of 6 lineal yards; and to enable you to make a fair estimate, you wish to know the number of solid yards in a rood: Look for the dimensions of the ditch in the left-hand columns; and opposite, you have 7 solid yards, in the column of 6 yards in length.

Example 3d.—If you are engaged to cut a Canal, 14 feet wide at the top, 4 feet at the bottom, and 4 feet deep, and 400 yards in length; and you wish to know the amount at 4d. per solid yard: Look for your dimensions in the Table, and opposite, in the column of 1 yard in length, you have 4 solid yards, which multiplied by your length 400 yards give 1600 solid yards, at 4d. per yard, amounting to £.26 13s. 4d.

TABLE IX.

*Shewing the LENGTH required to any BREADTH, from 15 to
86 Links of the Scotch Chain, for 1, 2, 3, 4, and 5
Lippies, of 100 Square Ells each.*

EXPLANATION.—The left-hand column contains the Breadth of the ridge or piece of Land, in Links of the Scotch Chain; opposite to which, in their proper columns, stand the different Lengths for 1, 2, 3, 4, and 5 Lippies.

Example.—Suppose you have a ridge 34 links broad, and wish to know the length for 4 lippies? Look in the left-hand column for 34, and opposite, in the column of 4 lippies, you have 204 links and 2 tenths of a link, the length required.

NOTE.—If you want the length for 6 lippies, corresponding to any breadth in the Table, double the length for 3 lippies; for 7 lippies, add the tabular lengths for 3 and 4 lippies together; in this manner the length for any number of lippies whatever may easily be found: but should your breadth exceed the limits of the table, divide the breadth of your ridge by 2, 3, or 4, &c. as most convenient, then find the length in the table corresponding to this breadth, taking care to divide the length so found by the number by which the breadth was divided, for the true length.

Example 1st.—Suppose a Farmer has a piece of land 72 links broad, which he wishes to divide among his servants for Potato ground in lots of 6 lippies; what length must he measure for each lot? Look in the left-hand column for 72, and opposite in the column of 3 lippies are 72 links and 3 tenths of a link, the length for 3 lippies, the double of which is 144 links and 6 tenths of a link, the length for 6 lippies.

Example 2d.—If you wish to know the length for 5 lippies, the breadth being 108 links of the Scotch Chain: Look in the Table for 54, half the breadth, and in the column of 5 lippies, opposite, you have 160 links and 8 tenths of a link, half of which is 80 links and 4 tenths of a link, the length required.

NUMBERS

By which, if LINKS of the Scotch and English Chains be MULTIPLIED, will produce ELLS, YARDS, and FEET,

To Reduce Square Links of the Scotch Chain } into Scotch Ells, <i>Multiply by</i> - - -	.0576
To Reduce Square Links of the Scotch Chain } into English Yards, <i>Multiply by</i> - - -	.06125625
To Reduce Square Links of the Scotch Chain } into Feet, <i>Multiply by</i> - - - - -	.5513
To Reduce Square Links of the English Chain } into Yards, <i>Multiply by</i> - - - - -	.0484
To Reduce Square Links of the English Chain } into Feet, <i>Multiply by</i> - - - - -	.4356

TABLE X.

*Shewing the LENGTH and BREADTH in ELLS required for
1 and 2 LIPPIES, of 100 Square Ells each,
from 2 to 26 Ells in breadth.*

EXPLANATION.—In the left-hand column is the Breadth of the Land to be laid off, in Ells and Quarters of an Ell ; in the other columns are the corresponding Lengths for 1 and 2 Lippies, in Ells, Quarters, and nearest convenient Fraction of a Quarter.

Example.—Suppose you have a piece of land, 16 ells broad, to be divided in lots of 2 lippies, and you wish to know the length for each lot : Look in the column of 2 lippies, and opposite to 16 ells in the left-hand column, are 12 ells and 2 quarters, the length of each lot.

NOTE.—By halving, doubling, &c. any number of lippies at any breadth may be measured off.

Example.—Suppose you have a piece of land, 40 ells broad, and you wish to know the corresponding length for 16 lippies: Look in the left-hand column for half the breadth of the ridge, 20 ells, and opposite in the column of 2 lippies you have 10 ells, which multiplied by 4 give 40 ells, the length required.

* * * *The use of this Table is chiefly designed for those who are not provided with a Chain.*

TABLE XI.

For MEASURING DYKES or WALLS, from 1 Foot 6 Inches to 15 Feet high; the Length being taken in Scotch Chains, and Multiplied by the numbers opposite their different heights, will give Mason Roods of 36 square yards.

EXPLANATION.—The Height of the Dyke or Wall stands in the left-hand column; and opposite, in the middle column, is a number by which, if you multiply the length of the Dyke taken in Scotch Chains, all on the left of the decimal point will be Mason Roods of 36 square yards; and the figures on the right, the decimal of a rood, which if multiplied by 36 will produce the remaining yards: In the right-hand column is the Length, in Feet and Inches, for One Rood of Mason-work, corresponding to the Height of the Dyke or Wall to which it stands opposite.

Example 1st.—Suppose a Dyke 6 Scotch Chains and 50 links in length, and 6 feet high, how many Mason Roods does it contain? Look in the Table for 6 feet high,

And opposite is - - - 1.375
Multiply by the length 6.50

68750
8250

8.93750

Multiply the decimal for yards by 36

562500
28125

33.75000

Ans.—8 Roods, $33\frac{1}{4}$ Yards, the quantity required.

Example 2d.—Suppose you have a Dyke 4 feet high, and wish to know the length necessary to make a rood: Look in the left-hand column for the height of your dyke, 4 feet, and opposite, in the right-hand column, you have 81 feet, the length for a rood.
